About Natural Sound

Natural Sound Recording Studio is a 24-track, all-digital recording facility conveniently located in St. Paul. We offer state-of-the-art equipment and 20+ years of experience to insure you receive the highest quality recording.

The Package

I will come to your house and record your stories. I use the same equipment that we use in the studio to record professional singers, vocalists and announcers.

Everything is done in a familiar and comfortable setting.

At the studio, I finish the process and put together a package designed for your family. You can order as many as you want. They will become family treasures.

The Story

Imagine your grandchildren listening to **your** mother telling stories about *her* mother. My grandmother left my father a cassette tape which detailed the story of my family's immigration into this country.

What stories will be lost to your family as the mobile world of today spreads family members across the globe. Don't let this happen to you.

Preserve the oral tradition so that generations to come can hear history from the best teacher, the person who has lived it.

Other Services

Cover Design

Let a family member design the cover. The design is printed on the CD and laminated so it doesn't scratch or run if it gets wet.

Cost

Our rate is very reasonable. Give me a call, we can discuss the details, and I can give you an estimate
